Education

2015 - 2019	**UNIST,** Electronic Engineering, 1st Major Human Factor Engineering, 2nd Major	*Bachelor*
2019 - 2021	**UNIST,** Brain-Computer Interface Lab (BCILAB)	*Master*

Proects

2022.04–2022.06

Real-Time Wav2vec2 for Korean

Personal Project

I performed the transfer learning by applying the Korean dataset (Ksponspeech) to the pre-trained (Wav2Vec-xlsr-53) model. A service was established to provide recognition results for real-time voice data. It is available in my Github repository.
Skills: NLP, Speech-to-Text (STT), Automatic Speech Recognition (ASR)

2021.10–2022.06

Prediction model for Depression

iMediSync

I made the prediction model for depression using EEG data. After the pre-processing, feature was extracted by background knowledge and selected based on Ensemble based feature importance. SVM model shows accuracy of over 90% in binary classification. Recently, I'm also trying to apply Deep-learning based SOTA models such as EEGNet, Shallow ConvNet etc.
Skills: Brain Signal Processing, Feature Extraction and Selection, Deep Learning Modeling, Statistics

2021.03–2021.10

Denoising Algorithm for HRV

iMediSync

Denoising algorithm for ECG and PPG signal based on Pan-tompkin algorithm. This was adopted as a standard denoising algorithm for over 1,300 data in the company.
Skills: Heart Signal Processing

Languages

Research Experience

2021 - Now	**iMediSync** AI Research Team	*ML Researcher*
2019 - 2021	**UNIST** Brain-Computer Interface Lab (BCILAB)	*Graduate student*
2018 - 2019	**UNIST** Brain-Computer Interface Lab (BCILAB)	*Research intern*
2017 - 2018	**SNU** Music and Audio Research Group (MARG)	*Research intern*

International Conference and Exhibition

2019 *Society for Neuroscience (SfN)*, Chicago.
2022 *CES Show*, Las Vegas.

Publication (SCI / SCIE)

2022 **Prediction model for Depression using sex and age-matched EEG biomarker**
Frontiers in Psychiatry
Accepted in August, 2022

2022 **iSyncWave: dry sensor-based multipurpose EEG device with potential to replace wet sensor-based EEG devices**
Frontiers in Neuroimaging
Under Review

2022 **Decoding Imagined Musical Pitch from Human Scalp Electroencephalogram**
IEEE TNSRE
Under Review

2022 **Cortical representation of musical pitch in event-related potentials**
Cognitive Neurodynamics
Under Revision
